

Ways to Support the Server

First of all, thank you for considering supporting the server. Without donations, this server could not exist, and I am thankful for all of it.

With that said, here are a few things to note before you decide to help the server out:

1. You will not receive any tangible benefits to donating. The only benefits you will receive will be cosmetic - tags, access to VIP channels in the Discord, and so on.
 2. You will not receive any preferential treatment for donating. You are still subject to the server rules, and there is no leniency given to donors.
-

Method 1: Donate directly to the server.

We use Tebex for all direct monetary server donations. This covers our ass in terms of the FiveM terms of service, and ensures that money donated can be spent on more than just server hosting costs.

You will receive a Tebex Supporter role for as long as you support the server. You can pay once, or choose to renew every month.

Be advised that Tebex takes a 20% cut of all donations made. Therefore, if you donate \$10.00, we will only receive \$8.00 of it.

All money donated to the Tebex goes back to the server. We do not make any profit off of donations.

[Click here to view our Tebex page.](#)

Method 2: Donate paid assets to the server.

Money isn't the only thing we need. There are many paid assets out there that we would love to have, however we have a clear set of instructions you must follow before you purchase anything for the server.

In order to donate a paid asset to the server, you must:

1. Ensure that you are a server member. We do not allow guests to donate paid assets to the server.
2. Open up a ticket with the following details:
 - a. The asset that you wish to buy. You should ensure that the asset does not conflict with existing interiors, and is lore friendly.
 - b. A link to the store where you will purchase it from. We must verify that the asset is not leaked, or stolen.
 - c. How much it costs, if it is not listed on the store.
3. Wait until you get explicit approval from a director before purchasing.
4. If you are purchasing an interior from a Tebex store, then we'll send you Jennifer's CFX account name. Ensure that the interior is gifted to that account otherwise we won't be able to access it.
5. If you are purchasing an interior from anywhere else, then send the interior file to a director after you have purchased it.

If you attempt to donate leaked or stolen assets to the server, you will be banned for participation in leaking. Ensure that a director verifies all purchases beforehand.

If you do not follow this guide, then there is no guarantee that the asset that you have purchased will be added. We are under no obligation to add all donated assets to the server.

Due to how escrowed assets work, we are unable to return any assets donated to us through Tebex. Once an escrowed asset is transferred to us, it becomes the property of the server.

After you donate an asset to the server, you will receive an Asset Donator role.

Method 3: Boosting the Discord server.

If you want to, you can boost the Discord server, and receive a Nitro Booster role. This offers the same privileges as the other roles. You will need a Discord Nitro subscription to do this.
